

PEREGRINE RIDGE

## Peregrine Ridge Limited Release Heathcote Shiraz

### Screw Cap Versus Cork

#### When do the wines start to differ?

We have observed that there is little difference between the two sealed wines until three to four years after bottling.

#### What happens at years three to four?

Characteristic	Screw Cap	Cork
Maturation	Almost non-existent. The wine retains the fresh fruit character of a young wine.	Slowly developing aged characteristics. Still fresh and vibrant.
Oxidation	Almost non-existent. This is causing the wine to develop reductive characteristics eg. evident oak and tannins.	Slowly developing the wine. Silky integration of primary fruit and oak flavours adding a degree of spiciness and richness not evident in the young wine.
Wine integration	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
Crust development	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>

#### What do the drinkers like to drink?

Cork

#### What do the drinkers like to purchase?

Screw cap
